

Day 1

Client: Good morning. Slept only around 5 hours last night. Daughter had exams, so I was awake late.

Client: Did some mopping, sweeping, Surya Namaskar and walking inside the house.

Client: Generally feeling happy today.

Coach: Good. Please keep sharing your daily updates for water, sleep, steps, exercise and meals.

Client: Had tea and some soaked nuts.

Client: Lunch was kadhi with soya and green vegetables.

Coach: Did you have salad before lunch?

Client: No. I still need to stock vegetables properly. Will do it tomorrow.

Client: Feeling some acidity since morning.

Coach: Did it start after eating something?

Client: No. Slept very late and did a lot of work today. Got up with acidity.

Coach: Did you walk after meals?

Client: Yes, around 15 minutes.

Day 2

Client: Walk and water done.

Client: Can I have banana stem, mint and ginger juice?

Coach: Yes.

Client: Tea 1 cup and 1 apple.

Client: Didn't eat much in the evening. Just a small piece of paneer.

Client: Still having acidity and bloating.

Coach: Please don't skip meals completely. Try to keep the meals simple.

Day 3

Client: I had to go to school after a few days. Very hectic morning.

Client: Coconut water, tea, prunes and some seeds till now.

Coach: Nothing else till now?

Client: No. I didn't get time.

Coach: Slowly we need to adjust the routine around your school schedule also.

Client: Yes. I know it will take time.

Client: Lunch had lots of vegetables, curd and some protein.

Client: Forgot ACV today. Not yet in the habit.

Coach: Set a reminder around meal timings.

Client: Yes, will do.

Accountability Coach: Today's update: Water 4 litres, Sleep 5 hours, Steps around 8,000, Exercise only walking.

Day 4

Client: Breakfast was 1.5 vegetable chapatis with seeds and ajwain.

Client: One cup tea.

Client: 4,500 steps so far.

Coach: Did you carry lunch to school?

Client: Yes.

Client: ACV done today.

Client: Lunch done. Trying to eat slowly.

Coach: Good. Chew properly and avoid rushing meals.

Client: Did around 20 minutes walking, stretching and breathing today. Feeling really good.

Day 5

Client: Weight seems slightly up even though I'm eating almost half of what I used to eat.

Coach: It is not always about eating less. Your body needs adequate nutrition.

Coach: Protein seems low in breakfast on some days.

Client: I didn't have sprouts today. Have ordered them.

Coach: You can also have boiled chana, moong or chhole.

Client: Forgot to mention, I had roasted chana at school.

Client: Did 20 minutes stretching and running.

Day 6

Client: Yesterday energy was very good. Today feeling low again.

Client: Bloating is back and I feel like I have gained weight.

Coach: Food intake was low today. Protein was also missing.

Client: I had roasted chana and kala chana.

Client: I am not getting enough time to plan meals. Next week should be easier.

Coach: That could be one of the main barriers right now. Let's keep the plan practical.

Day 7

Client: Steps 6,000 today.

Client: Sleep around 5.5 hours.

Client: Did mopping and sweeping also, lots of movement.

Client: Breakfast and lunch were okay.

Client: Sorry I missed your call. There was a stressful situation at work.

Accountability Coach: Tried calling you. Please update when free.

Client: Had a very hectic day today.

Client: There is a lot of office pressure and politics going on.

Client: During a meeting today I was so tired that my head went down on the table and I actually slept for a few seconds.

Client: Feeling very low.

Client: I feel I can sleep for days.

Coach: That sounds like a very exhausting day. Please rest today. We also need to look at your sleep and stress more carefully.

Day 8

Client: Slept better last night, around 8 hours.

Client: Energy feels much better today.

Client: Water around 3.5 litres.

Client: Did 30 minutes exercise.

Client: Steps around 8,000.

Client: Weight is around 83 kg. Waist almost same.

Client: Still having bloating on and off.

Client: But overall energy is much better than before.

Coach: That is good progress. Let's continue tracking sleep, bloating, meals and movement consistently.
